Att: Erika Timinski for
Jonathan McGinnis

Re: Attached Request for Survey Permission/
Parcel #:10007-33-4/Hunterdon County, NJ

Dear Ms. Timinski and
Mr. McGinnis

Since your letter of 12/15/14 asks for land owners to grant permission for survey work to be performed on their property, so as to allow a proposed PennEast Pipeline to be established on their property—without ample and “due response space” to not grant permission for such survey work—I am writing this letter to do exactly that; deny permission for any workers, either surveying alone or with others from Western Land and/or indeed, PennEast Pipeline, to walk, ride, hike on my property or to perform any tasks that would support that I am in agreement with any and all requests for such a pipeline.

Please be advised that the above-described Land, namely Parcel #:10007-33-4, is already established within the confines and commitments of a Farmland Preservation Easement held by the New Jersey Conservation Foundation, the United States of America and the County of Hunterdon, dated 10/30/2009.

My land has been secured for the perpetuity of “the Right to Farm” and as such, has been monitored for the past five years accordingly and successfully. I have enjoyed my walk and talks with my formidable partners and their representatives and have never felt pressure to defend and/or regret Green Land Restrictions until the PennEast Pipeline (and other’s like it) seemingly force a re-evaluation of “need” vs. “greed” and the distinctions between them.

I thank you for seeing those distinctions.

PennEast Pipeline Project

Tract No.: 1007-33-4

SURVEY PERMISSION FORM

I/We hereby give PennEast Pipeline Company, LLC (PennEast), its affiliates, agents, employees, and contractors, as well as its surveyors, biologists, archeologists, and environmental scientists, permission to enter upon my/our premises described below ("Property") to conduct civil surveys, environmental surveys, cultural resource surveys, and all other surveys and tests necessary for a pipeline route study, including, but not limited to the placement of stakes, limited non-mechanical (by hand) line-of-sight clearing, and geotechnical soil borings, subject to the condition that I am/we are paid for any and all damages to the Property caused by said surveys, if any. This permission includes the right to use existing roads, driveways, and trails as necessary. UGI or its agents are to give prior notice before entering property.

Date: _____, 2014.

FERC Docket for PennEast Pipeline is#PF15-1-000

Dear Ms. Bose:

Though this is a Sunday and very often considered a day of rest, I feel compelled to report how the PennEast Pipeline (excuse me, proposed pipeline) in its receipt of mail and other materials—solicited or not—arrive with immediate, self serving and often demanding-attention needs.

That being said and since a more careful read of today's "package," allows me to see that FERC itself will be the recipient of many pipeline "scopings," (i.e. information exchanges?) to help promote appropriate FERC decisions *Re: any and all pipelines.* As a matter of fact, at the last information event held at Del Val High School, it was said that "FERC had never met a pipeline it didn't like," and it wasn't said as a compliment.

I look forward to pipeline resolve and the integrity that resolve will mandate which, thus far, has been severely lacking in all areas pertinent to resolve. God Blessed America; now let's keep it Blessed!

Sincerely,

Marie E Wheaton

PennEast docket number: PF15-1-000

Dear Ms. Bose:

I am the owner of a farm located in Hunterdon County, Delaware Township, Stockton, New Jersey, 08559, referred to as Block 33, Lot 4, encompassing 38 acres. On a revised right away shown on the latest PennEast alternate drawing, the Proposed Pipeline is shown cutting right through the center of my farm. Five years ago, I placed my farm in the Farmland Preservation Program. I did this because of my desire to let future generations enjoy the beauty of this farm as has my family and in essence and with appreciation, many others—from those who marveled at its great green, fertile fields, its radiant glowing water supply (our pond) apples, pears, peaches, cherries, strawberries and yes, natural shoe-stain to keep our boots abundantly “in order” and at the ready for the cow-stanchion in the great German tradition of “milking and storing the liquid gold” we call cow’s milk. To those who have loved its open spaces, long walks and even, longer talks; to those who came to visit—once again, the homestead of their Delaware Township families—from restored head boards with secret “initials” and “best buddy markings,” and yes—to visit once again-- so as never to forget-the man who’s tombstone still graces this Farm, Mr. Ent Butterfoos!

The stewardship of this Farm—Lot 33-Block 4---PennEast docket number: PF15-1-000 is inconsistent with its numerical value and its PipelineMonetaryPossibility. This farm supports life and your plan—Pipelines to no future except to The Banks That Still Fail, destroys many more. (We may one day, learn to restore ruined crop fields; we will never learn to restore life to those we have taken life from—no matter how many death-kills you so designate and worse, “march these victims off in the name of capitalism, socialism, communism and/or profit.”

That may have been a game-plan; it isn’t anymore. Enjoy the defeat we so genuinely pass back to you. The planet may have indeed “changed;” so have its children. God Bless us All!

M. Pelli
Farm Owner
